american board and academy of psychoanalysis book prize winner for 2018 theoretical category  
we have entered the age of perversion an era in which we are becoming more like machines and they more like us  
the age of perversion explores the sea changes occurring in sexual and social life made possible by the ongoing technological revolution and demonstrates how psychoanalysts can understand and work with manifestations of perversion in clinical settings until now theories of perversion have limited their scope of inquiry to sexual behavior and personal trauma the authors of this book widen that inquiry to include the social and political sphere tracing perversion's existential roots to the human experience of being a conscious animal troubled by the knowledge of death offering both creative and destructive possibilities  
perversion challenges boundaries and norms in every area of life and involves transgression illusion casting objectification dehumanization and the radical quest for transcendence this volume presents several clinical cases

including a man who lived with and loved a sex doll a woman who wanted to be a barbie doll and an internet sex addict also examined are cases of widespread social perversion in corporations the mental health care industry and even the government in considering the continued impact of technology the authors discuss how it is changing the practice of psychotherapy they speculate about what the future may hold for a species who will redefine what it means to be human more in the next few decades than during any other time in human history the age of perversion provides a novel examination of the convergence of perversion and technology that will appeal to psychoanalysts and psychoanalytic psychotherapists social workers mental health counselors sex therapists sexologists roboticists and futurists as well as social theorists and students and scholars of cultural studies

the power of the ever increasing tools and algorithms for prediction and their paradoxical effects on risk the age of prediction is about two powerful and symbiotic trends the rapid development and use of artificial intelligence and big data to enhance prediction as well as the often paradoxical effects of these better predictions on our understanding of risk and the ways we live beginning with dramatic advances in quantitative investing and precision medicine this book explores how predictive technology is quietly reshaping our world in fundamental ways from crime fighting and warfare to monitoring individual health and elections as prediction grows more robust it also alters the nature of the accompanying risk setting up unintended and unexpected consequences the age of prediction details how predictive certainties can bring about complacency or even an increase in risks genomic analysis might lead to unhealthier lifestyles or a gps might encourage less attentive driving with greater predictability also comes a degree of mystery and the authors ask how narrower risks might affect markets insurance or risk tolerance generally can we ever reduce risk to zero should we even try this book lays an intriguing groundwork for answering these fundamental questions and maps out the latest tools and technologies that power these projections into the future sometimes using novel cross disciplinary tools to map out cancer growth people s medical risks and stock dynamics

the fossil record on mesozoic mammals has expanded by orders of magnitude over the past quarter century new specimens some of them breathtakingly complete have been found in nearly all parts of the globe at a rapid pace coupled with the application of new scientific approaches and techniques these exciting discoveries have led to profound changes in our interpretation of early mammal history mesozoic mammals have come into their own as a rich source of information for evolutionary biology their record of episodic successive radiations speaks to the pace and mode of evolution early mammals were small but they provide key information on the morphological transformations that led to modern mammals including our own lineage of placentalia significant and fast evolving elements of the terrestrial biota for much of the mesozoic early mammals have played an increasingly important role in studies of paleoecology faunal turnover and historical biogeography the record of early mammals occupies center stage for testing molecular evolutionary hypotheses on the timing and sequence of mammalian radiations organized according to phylogeny this book covers all aspects of the anatomy paleobiology and systematics of all early mammalian groups in addition to the extant mammalian lineages extending back into the mesozoic

as per this circular the c b s e will undertake aptitude test twice once at the end of class ix and then at the end of class x the aptitude tests along with other school records and cce would help teachers students and parents in deciding the choice of subjects in class xi the present series of books know your aptitude for classes ix and x covers all aspects of aptitude testing required at these levels each of these books has been divided into two units namely general aptitude test and scholastic aptitude test general aptitude test comprises the following topics 1 visual reasoning 2 numerical reasoning 3 verbal analysis 4 sequential reasoning 5 spatial recognition 6 three d 7 systems 8 vocabulary 9 aptitude profiling and selection of subjects 10 aptitude tests scholastic aptitude test comprises four scholastic aptitude tests in each of the following subjects 1 mathematics 2 science 3 social science
